Computing Systems and Networks – The internet
## Year 4 Knowledge Organiser

Know how to:

Describe how networks physically connect to other networks.

Recognise how networked devices make up the internet.

Outline how websites can be shared via the World Wide Web (WWW).

Describe how content can be added and accessed on the World Wide Web (WWW).

Recognise how the content of the WWW is created by people.

Evaluate the consequences of unreliable content.

Key questions:

1. What is the internet made of?
2. What is a website?
3. How do I know that I can trust the things I find on the internet?

Here are some common parts of a website:

Logo, Links, Video, Text

Key Vocabulary	
Word	**Definition**
WWW	The world wide web.
Unreliable material	The low probability that a system will perform what it needs to perform.
Content	Written text on an email, web page or on a file.
Website	Web pages which have the same domain name.
Internet	A global computer network which has a variety of information.
Network	A group of interconnected systems on the internet.

Connecting networks

...and to connect lots of networks together.
